

## Micro-dosing pumps

he (mdp) micro-dosing pump meets the highest standards of precision, reliability and compactness and is therefore ideal – essential, even – for dosing applications involving all types of liquid in the analytical, chemical and pharmaceutical industries.

It is robust, hard-wearing, easy to maintain and suitable for superheated steam sterilisation applications.

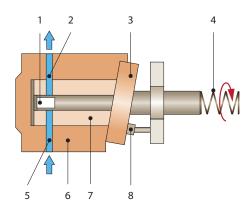

## Operating principle of a mdp+

- 1 Piston with bevel
- 2 Outlet port
- 5 Inlet port6 Pump head

8 Sliding block

- 7 Cylinder
- 4 Pressure spring
- Rotating parts
- Fixed parts

3 Sliding disk

We offer a wide range of different pump designs.

- 1. Dosing volumes from 0.1 to 160  $\mu$ l per stroke (see table)
- 2. Adjustable dosing: fixed, manual or automatic
- 3. Flushing function
- 4. Pumping drive system
- 5. Position detection sensors

## Dosing range

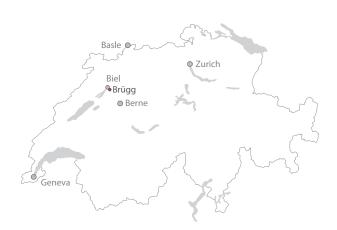

Single dosing (in μl)	Pumping (in ml/min) by 300 U/min	Accuracy	Туре
0.1 - 6.0	0.03 – 1.8	5%	XS
3.0 - 36.0	0.9 – 10.8	3%	S
8.0 - 80.0	2.4 - 24.0	3%	m
15.0 – 160.0	4.5 - 48.0	3%	1

## Pump designs

Design	Dosing range	Dosing system	Flushing function	Pumping drive	Sensor of position
mdp+	xs, s, m, l	fix, manually	manually	Step motor <sup>1</sup>	1 or 2
mdp pro	xs, s, m, l	automatically	automatically	Step motor <sup>1</sup>	1 or 2

<sup>1</sup> Optional with servo motor

We would be delighted to assemble the right pump for your particular application on request.
